

Dear Hiring Team,

I am looking for the Entry-Level Full Stack Software Developer position. As a Green Card holder originally from Myanmar (Burma), I am legally authorized to work in the United States and am willing to relocate. In May 2024, I will graduate from Columbia University with a Bachelor of Arts in Computer Science, and I have built a strong foundation in full-stack development through hands-on projects and industry experience.

In my current role at Revature, I design and implement applications using Java, Spring Boot, React, and SQL. Through this experience, I have honed my ability to develop RESTful APIs, manage databases, and collaborate effectively in an Agile environment. My internship at SECOMM allowed me to refine my front-end development skills, creating intuitive, responsive user interfaces using React, HTML, CSS, and JavaScript. Additionally, my participation in CodePath provided an opportunity to work on real-world projects, follow best coding practices, and gain further experience with teamwork and problem-solving.

I am excited about the possibility of bringing my technical expertise, collaborative mindset, and passion for continuous learning. My background in full-stack development and my eagerness to take on new challenges make me confident that I can be a valuable contributor to your team.

Thank you for your time and consideration. I look forward to discussing how my skills and experiences can support company's goals. Please feel free to contact me at channyeinzin.fl@gmail.com to arrange an interview.

Sincerely,

Chan Nyein Zin (Noel)
